1 Entorno de producción académica

El presente documento propone el uso de Pandoc como entorno puramente textual de producción gráfica de documentos académicos ó de alta complejidad [1]. El texto plano beneficia a todos los usuarios, deben poder encontrar lo que necesitan, comprender lo que encuentran y usarlo para realizar tareas [2].

2 Pandoc

Powerful, extensible, and feature-packed academic publishing toolkit. Build and customize with Pandoc, utilize prebuilt a typesetting system (TeX) and components, and bring projects to life with powerful filters.

2.1 Generar pdf

```
pandoc README.md --mathjax \  
-F pandoc-crossref -F mermaid-filter --citeproc \  
--template=plantilla --pdf-engine-opt=-shell-escape \  
-s --toc --toc-depth=3 --number-sections --columns=80 \  
-o README.pdf
```

```
# ó  
make pdf
```

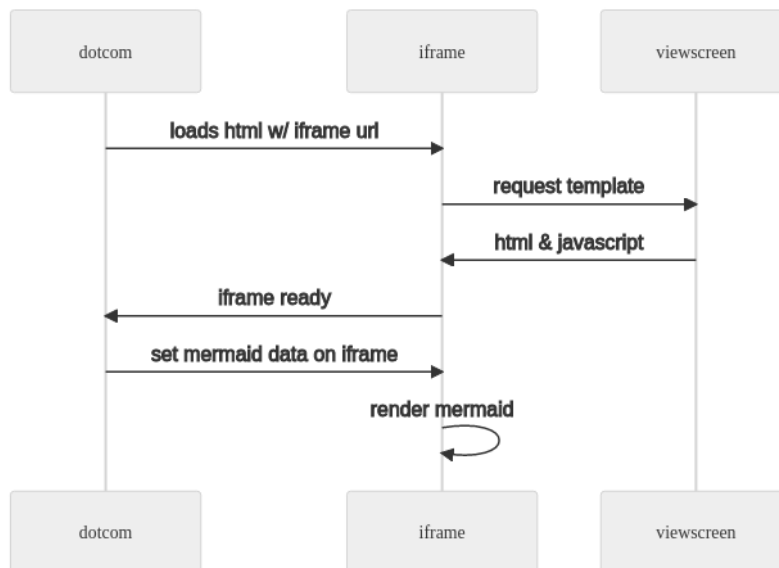

3 Citas y referencias bibliográficas

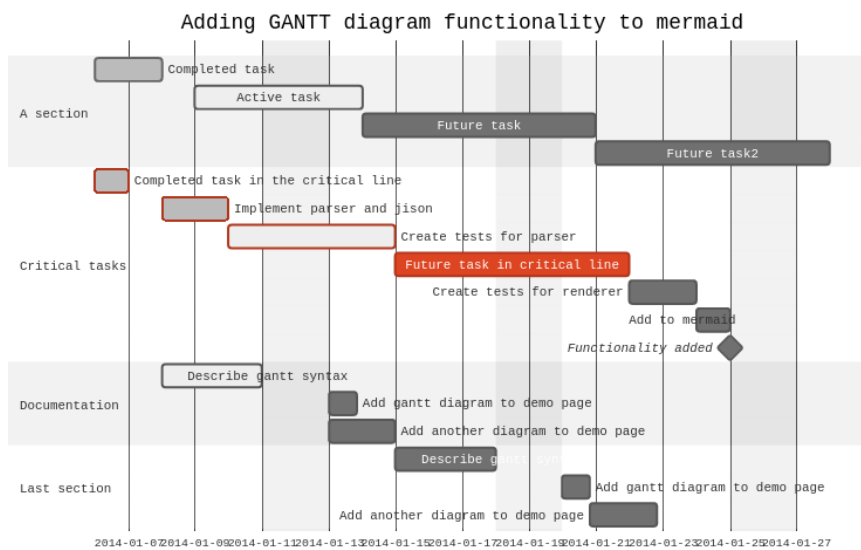

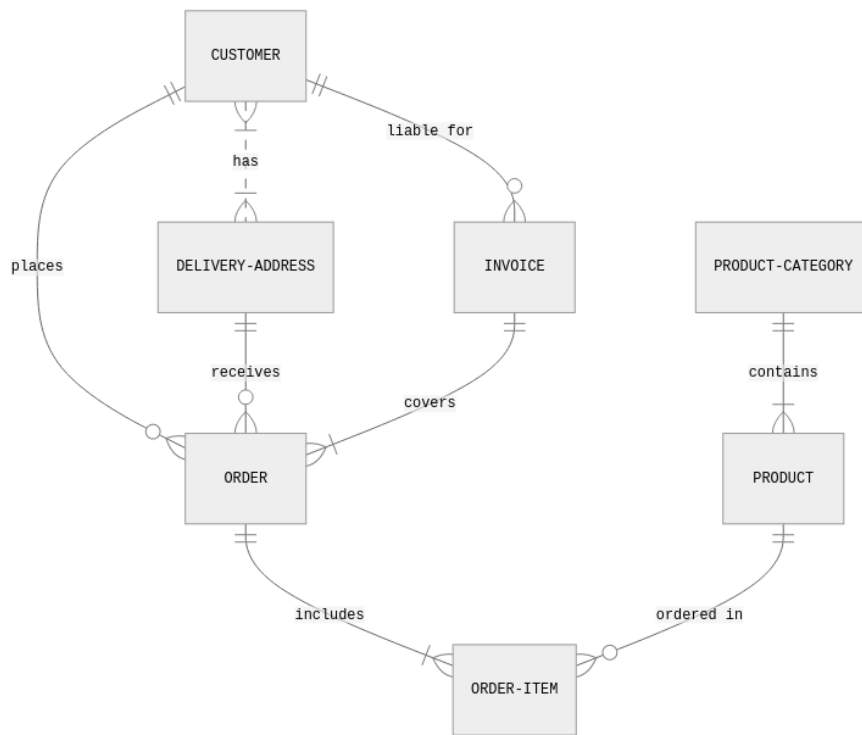

Este es el ejemplo de referencia [3].

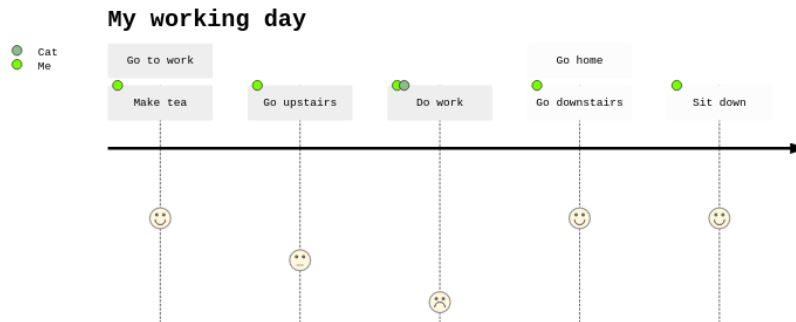

Una referencia con paginas [4, pp. 12-23].

4 Gráficos y diagramas

```
~~~mermaid  
sequenceDiagram  
    Alice->>John: Hello John, how are you?  
    John-->>Alice: Great!  
~~~
```

4.1 MathJax

When $a \neq 0$, there are two solutions to $(ax^2 + bx + c = 0)$ and they are

$$x = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}.$$

5 Markdown

This Markdown cheat sheet provides a quick overview of all the Markdown syntax elements. It can't cover every edge case, so if you need more information about any of these elements, refer to the reference guides for basic syntax and extended syntax.

5.1 Basic Syntax

These are the elements outlined in John Gruber's original design document. All Markdown applications support these elements.
